

3board[®] India- 2021

A Part of Citrus Enterprise

Welcome to our collection of 3D Printed Wall Panels, Made from bamboo fibre. Our products are sustainable, lightweight and easy to install

CITRUS ENTERPRISE

Welcome to 3D Board India

A unit of Citrus Enterprise

Inspired by patterns and shapes. Bring your space to life with our 3D-printed wall panels. Sustainable, modern and limitless has been the architect behind our designs and services.

Our wall panels are made of bamboo extracts and can be painted to your liking and installed by simply adding water-based glue or any strong adhesive. A newer alternative to wallpapers and wall decor.

Paint. Light. Create.

Take your living spaces to a new world of wall decor.

A green and Eco Friendly Product

3D board wall panels are considered a recycled product. Plant fiber is the raw material used in production of this cutting-edge wall decor.

Plant fibers are one of the world's most renewable sources as they are often harvested several times a year. The total harvest worldwide runs into billions of metric tons annually.

3D board wall panels are produced from plant fibers that are compostable and therefore biodegradable. The production process and use of raw materials make 3D board wall panels a real eco-friendly product.

CITRUS ENTERPRISE

The Block Series

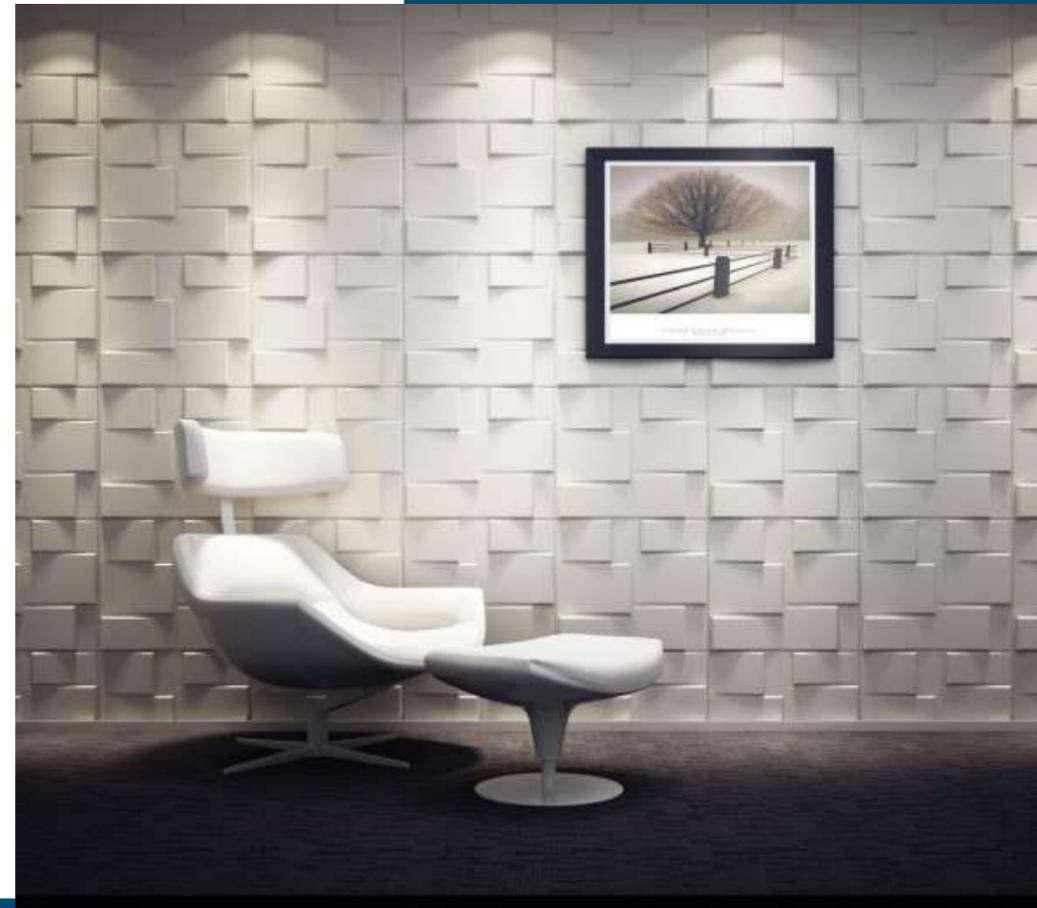

Our Block series of 3D Board wall panels comprise of designs that are patterned from Squares and Rectangles.

Rubik Panels - 500*500 mm | 50*50cms
